

// websites & web apps

We build it. You own it.

Designed from scratch, live in weeks, then handed over whole: the code, the accounts, the data.

No yearly maintenance fee.
No hosting bill.

0

yearly maintenance fee

100%

yours to keep

100+

countries worldwide

24/7

protection from attacks

// 01 · on the house

Free with every build.

Most agencies bill for these every year. With us, they come with the build.

● hosting

Hosted **worldwide**

Served from 100+ countries, close to every visitor. No hosting bill, no slowdown on busy days.

● speed

Instant page loads

Fast on any phone, on any network. Open madian.in on your phone and see for yourself.

● security

Protection, **all year**

Attacks like DDoS floods and React2Shell are blocked before they reach your site. Always on.

● ai

AI inside your app

An assistant that answers customers day and night, or AI that sorts and summarises.

● email

5 business mailboxes

Addresses on your own domain, on the web and on your phone.

● email

3,000 emails a month

Enquiry alerts, order confirmations and password resets, sent from your own domain.

● seo

Found on Google

Titles, descriptions, a sitemap and Google Search Console, set up for every page.

● ai agents

Ready for AI agents

AI assistants and AI browsers can read your pages and use your forms, like a customer would.

● backups

A 7-day undo

Made a mistake? Rewind your data to any minute in the past week.

// also free

✓ the secure lock (https)

✓ spam-proof forms

✓ link previews on whatsapp

✓ 10 gb for photos & files

✓ scheduled reminders & reports

✓ private visitor stats

No trial. No renewal date. All of it runs on cloud platforms that millions of businesses already trust, with no time limit, and it stays yours for as long as their plans run.

// 02 · what we build

From one page to a full system.

Six levels. Each one includes everything in the level before it, and everything on page 1. Not sure where your idea fits? Tell us in one line and we'll tell you.

01 	a landing page A creative page that sells you, live on your domain.	about a week for looking serious by friday
02 	it collects data Forms, uploads and a private place to see every submission.	about two weeks for leads and applications
03 	users & roles Sign-ins, permissions, approvals. A system your team runs on.	four to six weeks for teams done with spreadsheets
04 	it takes payments Cards, Apple Pay, Google Pay, receipts, refunds and a ledger.	five to seven weeks for fees, bookings, subscriptions
05 	ecommerce Catalog, cart, checkout, orders, and a panel to run it all.	six to eight weeks for selling products, end to end
06 	completely custom Several systems in one. If it talks to a server, we build it.	four to eight weeks scoped with you, fixed in writing

// 03 · how it works

Small crew. No handoffs.

01 One message Tell us the idea. Get a price and a date in writing, usually the same day.	02 Design first You see and approve the design before we build.	03 Live on your domain Deployed, not delivered. Not a zip file and a goodbye.	04 Keys handed over Code, accounts and a runbook. 30 days of free fixes. No yearly fee.
---	---	---	---

// your move

Bring us the idea.

A straight answer, usually the same day.

Free allowances follow the standard limits of each cloud service. Most business sites and apps stay well inside them. Past them, normal pricing applies, on your own accounts. Domains are paid separately.
